

Build content-rich barcodes, QR codes, and labels for display or print right in ServiceNow!

Barcode & QR Code Generator allows anyone to build beautiful, content-rich barcodes & labels using a simple, point-and-click interface.

Enterprises use ServiceNow as the source-of-truth for everything from Assets to Users. Barcode & QR Code Generator empowers you to more easily catalog and tag those pieces of data with barcodes, QR codes, and rich-text labels

Barcode & QR Code Generator dynamically builds labels from content on any ServiceNow table, rendering it on forms & pages, or printing it to a connected device.

Key Features:

- Barcodes may contain static data or dynamic data dependent upon the record being applied
- Barcodes may contain multiple contents of varying types
- Barcode content can be text, spacers, HTML, barcodes, or QR codes
- Barcode labels (as well as all contents) can be custom sized and aligned
- Sample Formatter & UI Actions are included to facilitate viewing and printing barcode labels
- Compatible with all modern browsers
- Supports barcode types:
 - Codabar
 - CODE128
 - CODE39
 - EAN2
 - EAN5
 - EAN8
 - EAN13
 - ITF14
 - MSI
 - MSI10
 - MSI11
 - MSI1010
 - MSI1110
 - Pharmacode
 - QR Code
 - UPC

Uses include:

- Generate Configuration Item barcodes directly on the form for simple scanning
- Generate & print asset tags directly from ServiceNow for corporate devices
- Batch generate asset tags from a filtered list
- Generate QR Codes linked directly to ServiceNow content
